Experiment 6:Link Jira with Confluence

1. Aim

To integrate Jira tasks with Confluence to monitor task status and track project progress for the Library Management System.

2. Tools Used

- Jira
- Confluence

3. Procedure

1. Created a Jira project for the Library Management System.
2. Created five tasks related to library management.
3. Assigned priorities and updated task statuses in Jira.
4. Created a Confluence page titled **Library Management System Project Overview**.
5. Used the Jira macro to embed five Jira tasks into the Confluence page.
6. Displayed task details, priorities, and statuses.
7. Added a Sprint Progress section showing the task completion percentage.
8. Published the page and captured a screenshot.

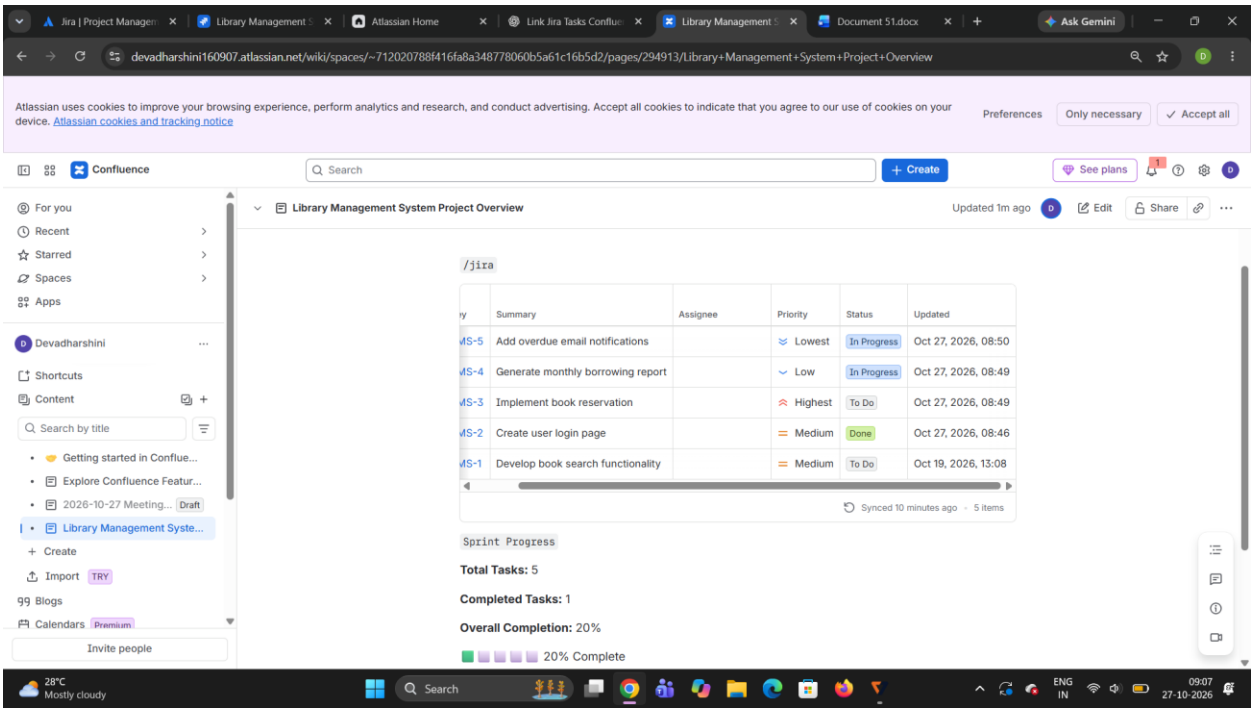

4. Algorithm

1. Start.
2. Create a Jira project and five tasks.
3. Set task priorities and statuses.
4. Create a Confluence page.
5. Embed Jira tasks using the Jira macro.
6. Calculate the completion percentage using:

Completion Percentage = (Completed Tasks / Total Tasks) × 100

7. Display the progress indicator.
8. Publish the page and capture the screenshot.
9. Stop.

5. Output

6. Result

Successfully integrated Jira tasks with Confluence to monitor task statuses and visualize the progress of the Library Management System project.
